FFIDAY EVENING, AUG. 21, 1963.

A Sailor of Bravery. What threatened to be one of the worst disasters in the history of shipping was the burning of the Ocean Monarch. The fire was discovered in her fore hold an hour or two only after she left the Mersey. There was a strong breeze, and she was headed for the Welsh coast.

By some unlucky accident an anchor was dropped, and the big ship was brought up all standing head to the wind. The flames came roaring aft, where 600 passengers and crew were

A Brazilian frigate, a yacht and a pilot boat were near, but they only at tempted to pick up those who jumped and swam. Suddenly up came an American clipper and rounded into the wind barely 200 yards away. In her first boat was Frederick Jerome, only an able seaman, but one of the bravest eamen that ever lived. In a flash his boat was alongside the burning ship, and he climbed on deck amid the scoreh and smother. There he stayed until the last soul of 600 was saved. His clothes were on fire seven separate times, and he was scorebed almost be-yond recognition. His only reward was the medal of the American Humane society.-Pearson's.

The Zodiacal Light.

The name of "zodiacal light" has been given to a singular appearance frequently witnessed soon after sunset or just before sunrise. It may be seen at all seasons of the year in low latitudes and is obviously due to illuminated matter surrounding the sun in a very flat or lenticular form, nearly coinclding with the plane of the ecliptic, or, rather, with the sun's equator. The attention of astronomers was first directed to it in the year 1683 by Cassini and was long regarded as being the sun's atmosphere. This idea, it is now thought, is incorrect, it being generally believed at the present time to consist of an immense assemblage of rocks, sand, cosmical dust, fragments of metal, etc., such as the earth is continual ly encountering in the form of aerolites or meteorites. It may not be out of place to mention in this connection that the rings of Saturn are believed to be composed of similar materials.

Mr. Herlihy looked at his latest photograph, taken in his Sunday clothes. and his gere bespoke keen disappoint-

"O'd never 'a' had this tuk if it hadn't been for thim children telling me about the improvements in photographing," he muttered, holding the card upon which his likeness was mounted farther and farther away. "Improvements is it? Old loike to show this pictur, solde be solde wid the wan Oi had twinty years ago and lave it to annybody which o' thim two made the betther man o' me. There's an old, anxious, toired out look to this new wan that was niver in the other.

"There may be improvements in pho tographing," said Mr. Herlihy as he deposited the cabinet sized card face down in his table drawer, "but Of've yit to see thim."-Youth's Companion.

Ether Vibrations

The effect of movements in the ether depends upon the rapidity of the vibrameasurement for short waves in the ether is the bicron, which is about one twenty-five millionth of an inch. Waves measuring 380 to 810 bicrons affect our sense of sight, the former number giv-ing violet and the latter red color. The invisible rays, to which the actinic and Roentgen rays belong, are shorter and have been measured as short as 100 Ether waves longer than those giving light give the feeling of avarmth. The longest heat waves are red rays, or one three hundred and fiftieth of an inch.

The pills that are potent in their action and pleasant in effect are DeWitt's Little Early Risers. W. S. Philipot of Albany, Ga., says: "During a bilious attack I took one.
